Evidence shows numerous benefits of using active learning activities: Using Active Learning Instructional Strategies to Create Excitement and Enhance Learning. Active learning instructional strategies include a wide range of activities that share the common element of involving students in doing things and thinking.

To counter these problems, active learning methods are being promoted to believe in using different active learning techniques for classroom activities. Barriers that prevent faculty from using active learning strategies include: (6) Bonwell C, Eison J. Active Learning: Creating Excitement in the Classroom AEHE-ERIC. Using Active Learning Instructional Strategies to Create Excitement and Enhance Learning (Eisen, Univ. of South Florida, 2010), Does Active Learning Work? Learner Centered Instructional Strategies: A Crash Course. How might we create learning environments and design learning experiences that aid in the development of new and personal ways of using content? The focus is less on covering material and more on using content to develop new and personal ways of using it. Active learning: Creating excitement in the classroom.

(2) gives the instructor presumed "control" in the classroom, although ironically those taught using active learning/cooperative learning, Hake.
